PERFIL PROFESIONAL

Civil Engineer and Full Stack Java Developer focused on creating scalable technological solutions that drive efficiency, innovation, and business growth. I combine experience in operations management, project leadership, and software development to optimize processes, solve complex problems, and deliver products aligned with organizational goals.
Seeking to join a collaborative team where I can contribute analytical thinking, adaptability, and problem-solving skills while supporting the development of impactful technological solutions and continuous business growth.

HABILIDADES TÉCNICAS

Visual Studio Code | JavaScript | Databases | Git & Github | HTML5 | CSS3 | Scrum | Jira | Bootstrap | Spring Boot | Java | IntelliJ IDEA

HABILIDADES BLANDAS

Leadership | Adaptability | Teamwork | Proactivity | Analytical Thinking | Attention to Detail | Organization | Decision-Making | Effective Communication | Problem Solving

PROYECTO ACADÉMICO

Programming Hackathon (April 2026 - July 2026)

- Participated in a software development hackathon focused on building innovative technology solutions.
- Collaborated with team members to design and develop a functional prototype under tight deadlines.
- Implemented frontend and backend functionalities using agile methodologies.
- Strengthened teamwork, problem-solving, and software development skills in a fast-paced environment.

EXPERIENCIA LABORAL

Full Stack Developer – Caliope Social Network (April 2026 - July 2026)

- Developed and implemented frontend and backend features focused on user management, content publishing, and interaction between readers and writers, following scalable architecture principles and coding best practices.
- Designed an interactive and responsive user interface to enhance reading and navigation experiences within the platform.
- Implemented business logic and frontend-backend integration to optimize information flow and ensure a seamless user experience.
- Created validation protocols and deployment checklists to improve software quality, stability, and release efficiency.
- Contributed to planning and delivering key functionalities using collaborative workflows and agile methodologies.

Engineering Specialist | ICA Fluor (June 2022 - June 2025)

- Developed engineering structures and systems using digital tools, strengthening analytical and technical skills.
- Managed and analyzed technical information for large-scale projects, improving organization and attention to detail.
- Generated and validated material lists and verification processes, ensuring quality, efficiency, and compliance with technical requirements.
- Collaborated with multidisciplinary teams to optimize engineering processes and improve project outcomes.

Engineering Specialist | FONATUR (January 2020 - April 2022)

- Reviewed and validated projects through technical documentation analysis and digital information management.
- Developed technical information using specialized engineering software to improve process efficiency.
- Participated in administrative and control processes, strengthening operational organization and continuous improvement.

FORMACIÓN EDUCATIVA

- **Junior Full Stack Java Developer Bootcamp** | Generation México (April 2026 - July 2026)
- **Master's Degree in Operations Management Engineering** | Universidad Anáhuac Norte (January 2021 - May 2023)
- **Bachelor's Degree in Civil Engineering** | Escuela Superior de Ingeniería y Arquitectura Unidad Zacatenco (August 2013 - December 2018)

CURSOS

- **Project Management and Agile Fundamentals** | Santander Open Academy (2026)
- **Master AI with Gemini** | Santander Open Academy (2026)
- **Introduction to Java, Java I, Java II** | Accenture (2026)
- **Introduction to Programming** | Accenture (2026)

IDIOMAS

- Spanish – Native
- English – Intermediate (B2)
